# About KERONE

KERONE is possessing experience of 40 years in engineering excellence.

KERONE is one of the most admired and valuable company for customer satisfaction.

KERONE is pioneer in application and implementation engineering.

KERONE is having immense expertise in manufacturing and implementing various types of heaters and dryers.

KERONE is possessing employee strength of more than 140 experts continuously putting efforts for happy industrial heating solutions.

KERONE has reported annual revenue of \$8 to \$10 Million , increasing year-on-year.

**40**  
YEARS  
OF  
MANUFACTURING EXCELLENCE

ENGINEERING

EXCELLENCE

## Vision

- Turn into world leader in providing specialized, top-notch quality and ecological industrial heating, cooling and drying solution across the globe.
- To attain global recognition as best of quality and environment friendly engineering solution company.

## Mission

- To enhance the value of customer operation through our customer need centric engineering solution.
- We are committed to provide our customers, unique and best in class products in Industrial heating, drying and cooling segment, with strategic tie-up for the technical know-how with renowned leader in the industry specific segment.
- We are company that believes in strong ethics and timely commitment helps to build long term relationship.

# Value Propositions

40 years of rich experience

Sound infrastructure

Adherence to standards

Timely delivery

Highly customized product

Cost effective solutions

Team of experts delivering quality

Great after sale support

## KERONE

(An Iso 9001-2008 Company)

A CRISIL-NSIC RATED COMPANY  
ISO-9001-2008 COMPANY  
AFFILIATED TO THE UNIVERSITY OF NOTTINGHAM  
MEMBER OF A.M.P.E.R.E.(EUROPE)

ASCB(E) Certification for Best practice

IRQAO Certified for quality

Member of A.M.P.E.R.E. (Europe).

ISO 9001-2008 Certified company

Recognized and Rated by CRISIL

CRISIL Verified

In Association with SVCH-Technologii,  
Moscow (Russia)

# Introduction of Microwave

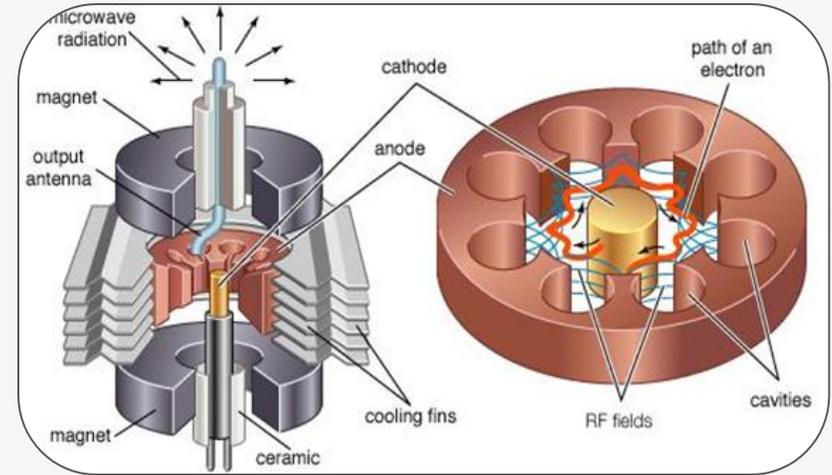

Microwave heaters is member of Electromagnetic heating family.

Microwaves has frequency of 2.45Ghz and 950Mhz.

Microwave is generated from small device known as Magnetron.

Microwave heaters has property to heat from within.

Microwave heater volume of material hence known as 'Volumetric Heating'.

# Microwaves Heater Classification

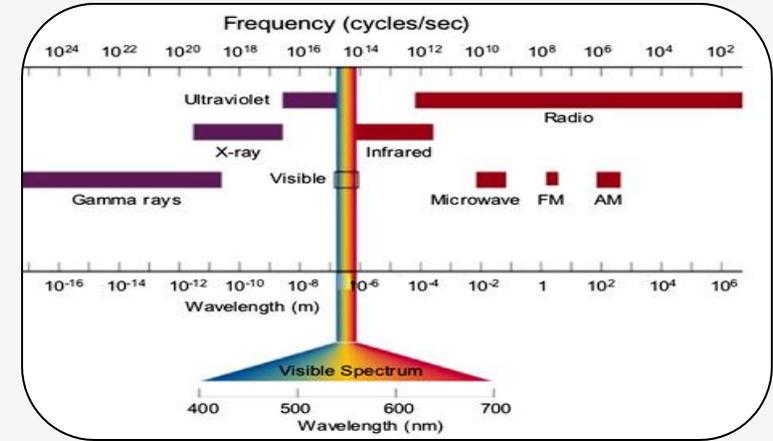

Microwave heating Systems are classified as follows :

## Based on Microwave Frequency

- 950 Mhz
- 2450 Mhz

## Based on Heater Type

- Batch
- Continuous
- Hybrid

# Microwave Heaters Vs Conventional Heaters

## Microwave Heaters

Microwave heating system generates the heat very fast within material.

Heating of materials are due to molecule movements hence no chamber warm up time is required.

Environmental friendly and green heating solution, no carbon emission.

100% energy utilization, as heating takes place within the material.

Better floor utilization index as it doesn't require chamber area.

No Temperature loss in surrounding, ambient workplace.

## Conventional Heaters

Conventional heaters have slow heating rate, heat is transferred via means of air.

Instance heating does not take place, it requires warm-up of surrounding.

Produces carbon or toxic gases hence not much environmental friendly heating solutions.

100% energy utilization is not possible, as material is heated by surrounding hot air.

Poor floor utilization index as it requires bigger chamber area for material to rotate.

Surrounding air temperature rises with rise in heater temperature.

# Microwave Heaters Vs Infrared Heaters

## Microwave Heaters

Microwave heating systems utilizes electromagnetic system uses wavelength of about 1 centimeters.

Heats the objects from within the object.

Microwave heaters also does not require larges space hence offers better floor utilization index.

Microwave heaters cant not substitute the conventional heaters.

Depth of heat penetration is higher in Microwave heaters.

Rate of heating depends on the moisture content within the material.

## Infrared Heaters

IR heating systems utilizes electromagnetic system uses wavelength of about 0.01 centimeters.

Heats the object from surface of object.

Compact system providing better floor utilization index.

Infrared heaters are better substitution of traditional convention heaters.

Depth of heat penetration is lower in infrared heaters as it heats from surface.

Rate of heating depends on the surface characteristics of material.

# Advantages Microwave Heaters

Uniform heating occurs throughout the material  
Process speed is increased.

Process speed is increased.

Desirable chemical and physical effects are produced.

Purity in final product.

Floor space requirements are decreased.

Reduction in unwanted side reaction  
(reaction Quenching)

Better and more rapid process control is achieved.

Better and more rapid process control is achieved.

Selective heating i.e. heating selectively one reaction component.

Improve reproducibility

High efficiency of heating.

Environmental heat loss is save, Reduce wastage of heat

# Microwave heater in Pharmaceutical Industries

Microwave based heating systems has very significant role in various process in Pharmaceutical industrial processing, some are mentioned below

Assists Drug Extraction

Microwave Digestion

Chemistry Synthesis

Sterilization

Drying and Powder Making

Thawing

Cancer Therapy

# Microwave heater in Plastic and Rubber Industries

Plastic and Rubber has increased its application in various application, so the demand. Below and few important applications those require heating:

Pyrolysis Of Plastic

Plastic Welding

Plastic Thermoforming

Vulcanization Of Rubber

Preheating Of Rubber

Pre Heating Of Solid Rubber Tyres

Extrusion Curing

Rubber Coating

Post Curing

# Microwave heater in Food Industry

The Food and Packed Food industry has multiple application that require microwave heating are as follows:

Tempering of Frozen Products

Thawing

Blanching

Baking

Drying/Dehydrating

Pasteurization and Sterilisation

Cooking

# Microwave heater in Ceramics

Glass and Ceramics find multiple applications those require Microwave heaters:

Plasma Processing

Liquid State Processing

Solid State Processing

# Trusted Partner of following consultants

# Our Clients

## Serving across Continents:

We are Exporting more than 50 Countries...

# THANK YOU
